

FOR IMMEDIATE RELEASE

CCS hosts "Machine Vision Solution EXPO 2024 in Yokohama"

Kyoto, Japan, June 28, 2024 – CCS Inc. (CCS) has announced that it will host a private trade show, "Machine Vision Solution EXPO 2024 in Yokohama," from December 4th (Wed) to 6th (Fri), 2024 at Shintoshi Hall (Yokohama Shintoshi Building, 9th floor), Yokohama, Kanagawa Prefecture, Japan.

CCS was established in 1993 with the philosophy of "Advancing Society with the Science of Light." Since then, it has advanced the machine vision industry by developing LED lighting for inspection, creating customer satisfaction for both manufacturers and their customers, who demand safe and high-quality goods. Today, CCS leads the machine vision world with thousands of innovative products including lights, controllers, and accessories. In the course of its rapid growth, CCS has insisted and focused on evolving from a mere lighting company into a lighting solution vendor to resolve customers' problems.

Since 2019, CCS has hosted the Machine Vision Solution Expo (Solution Expo), a private, pre-registration-only trade show that allows customers to not only see but also experience the latest machine vision solutions with broad applications.

In December 2023, CCS organized the "Solution Expo 2023 in Yokohama" at Shintoshi Hall, which showcased more than 40 solutions and featured multiple seminars on machine vision and its related technologies. During the three-day event, CCS welcomed more than 1,000 customers from Japan and 12 other countries and regions.

This year, CCS will host the "Solution Expo 2024 in Yokohama" at the same venue, where the partner companies will also be co-exhibiting. It is the perfect opportunity to experience numerous live demos. Customers are also welcome to consult with experts regarding their applications. CCS will open pre-registrations in mid-September 2024.
